Large button for easy actuation, even when wearing gloves

Rotating belt clip for easy attachment to clothing or equipment

Silent and tactile button

Optional protection ring to avoid unintended actuation

Actual Size

INVISIO[®] M15 is functional and reliable PTT solution for the professional user seeking an easily actuated PTT button. Delivered with an optional protection ring that eliminates the risk of accidental PTT button actuation. Made from a highly resilient plastic housing, making it extremely durable and environmental protected. The headset is connected with a threaded 3.5 mm jack to eliminate the risk of the headset accidentally unplugging. The radio cable is molded into the PTT with a rugged strain relief for added strength.

INVISIO[®] utilizes the patented Bone Conduction Microphone. It has no external microphone and captures vibrations in the user's jawbone converting them to crisp and clear sound. No external ambient noise around the user is picked up. As a result, the headset can be used in extreme situations with no interference commonly found when communicating in these environments.

Technical Specifications

Physical

Colours	Black
Weight	100 grams (incl. radio connector)
Dimensions	Ø 52 x D 28 mm

Optional protection ring

Rotating belt clip

About INVISIO®

For over a decade INVISIO® has developed high performance, tactical headsets for Special Forces, SWAT Teams, Law Enforcement and Fire & Rescue teams across the globe to meet their needs in extreme environments. INVISIO® offers an extensive range of tactical headsets and Push-To-Talk (PTT) solutions to equip the professional communication user.

INVISIO headsets utilize the patented Bone Conduction Technology™ which offers unsurpassed communication in all environments. Because of the unique voice transfer system, ambient sounds that can interfere during a conversation are eliminated. Wind, military vehicles, even gun fire is not transmitted - only your voice.
